Dear Editor:

Health insurance is a necessity for students

The lack of insurance is a major problem for many students at this university. The future costs of health care are astronomical and not affordable for most students. It is unfair to have to worry about insurance when you are trying to study and learn. There is no way that we can afford to pay for health care on our own. We need to have health insurance that is affordable and accessible to everyone.

Sincerely,

[Student Name]
