Scheib said they plan to use the money from FX to install a new hot water system to conserve energy in the houses. The new boiler system will have an uphill tank that guides the wood for maximal efficiency. Slight changes to the system would make it more efficient, but that means more wood for the same amount of warmth, but it will be less time taking, mess-free, and safer.

Scheib said they plan to see the money from FX to install a new hot water system to conserve energy in the houses.
