ITS offers tech breaks weekly. Tech breaks are one-hour work sessions to answer questions about technology issues. They are held every week from 2:30 to 3:30 p.m. in the Kellroome, room 204, until the end of the semester. Tech breaks are open to the public and are free of charge.

The workshops began last March as a collaborative effort of outreach from IT's Human Resources office and the Information Technology office. Each week, the workshop is led by an IT technician and covers topics such as computer hardware and software, Internet safety, and email etiquette. The topics vary each week, and workshops are advertised in the Student Senate meetings and on the university website.

The Tech Break committee selects top-performing students to give presentations on a variety of topics. Students are encouraged to present on topics that they are interested in or that they think would benefit the community. The Tech Break committee meets weekly to decide on the next group of presenters.

The workshops are designed to be interactive and are open to anyone who wants to learn more about technology. Students are encouraged to ask questions and participate in the discussion. The goal of the workshops is to help students become more comfortable with technology and to provide them with the skills they need to use technology effectively.

The workshops are free to attend, and no registration is required. However, students are encouraged to register in advance to ensure a seat. The workshops are held in the Kellroome, room 204, and are open to anyone who wants to learn more about technology.
