Senior works in field after discovering how little is known of bobcats in Midwest

Naomi Davis
Staff Reporter

It's hard enough to have a pet that's a little bit on the dangerous side, but what about a pet that wants to continue living in their natural habitat?

“People are fascinated with carnivores,” Petry said. “They really attract people’s attention.”

Project involves field research

It's hard enough to have a pet that's a little bit on the dangerous side, but what about a pet that wants to continue living in their natural habitat?

“People are fascinated with carnivores,” Petry said. “They really attract people’s attention.”

Senior biology major Adam Petry, from Truman, is focused on the move-
