Biking: 101

Bike maintenance requires a few tools and a desire to learn.

Students who bring their bikes to Kirksville can prevent bike theft and ensure their safety by learning to obey the biking rules of the road.

The number of bike thefts from Jan. 1, 2006 to Sept. 5, 2006.

Community bike program pauses to make repairs this fall

The Community Sharing Bike Program will take the semester off to address problems that have plagued the program, said Phillips. Phillips, who started the program last year, said the program had problems with the bikes and needed to be reorganized.

About 200 students registered for the program and were able to check out the bikes through the residence halls. Student organizations paid $10 to sponsor a bike and paint a logo and were able to check out the bikes through the residence halls. Phillips said they will spend this semester fixing up the bikes they currently possess.

“We had very few people who had mechanical skills,” she said. “So if you have some bike mechanic skills, we could provide you with some tools to fix the bike.”

Although Kirksville does not have any bike shops, students do not have to travel all the way to Columbia to get their bikes repaired.

Sophomore John Estes has a small bike shop in his bedroom closet. Estes keeps wheels, frames, inner tubes and other bike parts in his apartment where he builds older bikes he gives away. A self-taught bike expert, Estes said it was easy to learn basic bike repair and maintenance.

“My friend and I, we were going to go downtown, and I actually picked one up that the chain had come off of,” said Phillips. “We had very few people who had mechanic skills,” she said. “So if you have some bike mechanic skills, we could provide you with some tools to fix the bike.”
