Campus planner takes few days off

Campus Planner Mark Schultz is a self-proclaimed workaholic. While his cowboy boots and hat might suggest a country lifestyle, Schultz spends most of his time in the city of Kirksville, Mo.

“I could live in the country if I wanted to,” said Schultz. “And I always have.”

But the 49-year-old is not on a farm. Instead, he’s at Truman State University, where he has spent most of his career developing and implementing building renovations and construction projects.

Schultz said that while he enjoys the rush to get a design and then to get the building up — “I always have.”

“I like watching construction go,” he said. “I like the activity, and I like seeing the finished products.”

Schultz also enjoys the opportunity to build relationships with people.

“It’s fun to work at Truman,” he said. “I’ve been here a long time and I’ve made many friends. I’ve watched many students and employees grow up.”

Schultz said he sees no end to the work in front of him.

“I can see more work in front of me than I have left in my career,” said Schultz.

“I have one pair of boots from one of the Wellington boot company which makes the boots for the General Eng.

“If you have a really special is that we’re really good thing,” Hoylman said. “Also, what makes our program really special is that we’re really good ambassadors. She keeps the atmosphere of membership for the student

“This past visit day I met a girl that really likes Truman, especially the biosciences. I would like to see more people volunteer for it and be more involved, she said. The more people volunteer for it, the more they feel like they’re part of the Truman community, and if you don’t volunteer you might just be a little bit out of the loop.”

Webster said the ambassadors program gives incoming students a more intimate idea of what the University is like.

“It’s a really good way for us to get into the Tiger nation and learn about campus,” said Webster.

“This past visit day I met a girl that really likes Truman, especially the biosciences. I would like to see more people volunteer for it and be more involved,” she said.
