

The only thing as impressive as our cardiac technology is our heart care team.

With advanced technology and new cardiologists joining our medical staff, Northeast Regional Medical Center has your heart covered. Diagnostics like advanced nuclear image studies and a cardiac cath lab give us an inside look at your heart while our cardiologists treat you with compassion. Call your physician to schedule your annual physical or use our convenient physician referral line, 660-785-1319. And please, take care of your heart.
