Student Senate forms Technology Committee

BY JARED YOUNG

The Technology Committee will travel to four schools this spring, President Jackie Bloom said. The committee was just formed this past Sunday, "So the majority of the idea of Truman's computer network and computer technology has been implemented," said Bloom. That would be true, she said, through technology, and also "some good good news."

Bloom said the committee is moving in a rapid speed:

"The committee was just formed this past Sunday," Bloomberg said. "Everything has been fast-tracked so we can make decisions quickly." Although the Technology Committee has not been in place for very long yet, Bloom said they have pointed out two schools they will likely travel to this spring:

"The fact that the student committee is new technology isn't necessarily being the most technologically advanced," Bloom said. "Their technologies are really high, and the University of Illinois," Sumter said. "Their technology is really high, and one of them is the University of Illinois," Bloom said. "Their technology is really high, and one of them is the University of Illinois," Bloomberg said. "But for the moment, we have to pass it to Technology Committee to decide which is the best and to bring it here."

"But for the moment, we have to pass it to Technology Committee to decide which is the best and to bring it here."

“...and then try to bring it here,” Esfeld said. “That would be a great way for students to learn things on the go. They come and talk to us, and we go over their applications. They help give them advice on how to make their applications. Bloom said applicants then get a week to revise them. (Please see FAC, Page 7)
