Construction projects at Truman State University will be the focus of new TV shows.

"Tunisia has agreed to film a special episode on the work in the Missouri Hall drain," said Assistant News Editor Seeley Said. "However, the Council has not yet set a time for the show to air."

Tunisia is planning to film renovation work on the Missouri Hall drain. The program will be aired on Time Warner Cable's News 36 channel.

The new shows will be filmed in the fall and spring, and will be aired on a biweekly basis.

Parking lots have been a hot topic for the Council in recent weeks, and will continue to be in the future.

The new parking lot will cost about $170,000, and will be funded by the Council.

Mike Rettke, executive producer of News 36, said the committee has agreed to return an exposure to the citizens who would like to be here. The committee will be assisting in giving the Council the opportunity to put their ideas forward in order to have a budget for the meetings.

The meetings always discussed major issues that pertain to all Kirksville residents — this includes appointments and contractors. There have been some issues that have been open to the public, but some have been closed to the public. However, the Council has been looking for a way to further publicize meetings in order to make sure that everyone is aware of the meetings.

The meetings have been therefore been an option for the Council. This is to prove that the city is being transparent and open to the public. The meetings are open to the public, but some have been closed to the public.
