A small group of young entrepreneurs at Truman State University have been baking a lot of bread every week. The work typically takes place in home kitchens, producing about 50 loaves of bread, which are purchased at Hy-Vee or the local Menno Farmers Market. The team have noticed an increase in the electric bill, and their small, non-commercial ovens are taking a toll. A loaf of bread typically costs $1.

"A power muffin is a hardy whole-wheat milk and apple muffin with cinnamon, a lot of energy — lots of nuts and bananas," Tumminia said. "Though half sugar, it is lowfat and has a lot of fiber."

Senior Brent Wiley sells bread to Kirksville resident Tim Fender Saturday morning out of his garage because of uneven weather at the farmers market. The team have noticed an increase in the electric bill, and their small, non-commercial ovens are taking a toll. A loaf of bread typically costs $1.
