Senate proposes changes

Document outlines ideas to improve University, includes sustainability and wet events

The Board of Governors showed enthusiasm for Student Senate’s new vision document.

In the document “Beyond the Horizon,” Senate made recommendations for the University to improve. The document will be published next spring.

Lisa Eibl, chair of the Student Senate Vision Documents Committee, said the other students on the committee are writers and have written Truman’s challenge. The document was written by the committee on April 12 and published on April 15.

“Everything that we recommend in the document at the end of the day, we believe is important,” Eibl said. “I think we’re all excited about it.”

Eibl said the Vision Committee was established in late spring, and this was the first document that students have been creating.

Eibl and other members of the committee said there are plans to create a new procedure for all student organizations to make sure they are following the guidelines.

“Many students don’t understand the importance of things like sustainability and wet events,” Eibl said. “It’s really important, and we need to be able to raise awareness of it.”

Senate proposes changes

Construction on the southern section of the new building will continue this fall, with some areas to open as soon as next semester.

From the center courts south, Schultz said this would be much more efficient than running three rafts on one pump.

“We have a lot of schedule flexibility,” Eibl said, while also noting that more expensive.

“We have a lot of schedule flexibility,” Eibl said, while also noting that more expensive.

“You have to have some type of schedule flexibility,” Eibl said. “We don’t want to run anything now because we’re trying to get everything right.”

“Some things may not be realistic at all,” Eibl said. “But we are working on it, and it will be all right.”

“For some things, we can make it work, but for others, we have to come up with a new plan,” Eibl said. “It’s all about being realistic.”
