A campus-wide PAS system is being implemented at Truman. The idea of converting to a PAS over the summer made some students upset, because any remaining at the end of the semester will be lost. Residence Life is now looking for a replacement for the system, so systems such as the new ID cards, or proximity cards could be money wasters because they don’t provide enough security. This could cause problems for residence halls in the future, as they need to replace cards, and need to have a system in place to keep track of what the cards are being used for. A number of students have told residence life that this is a system that will cause an inconvenience, but they see the safety component far outweighs those inconveniences.

Theater department receives cuts

Theater students are diagnosed after realizing an upcoming 20 percent cut in department faculty. Currently, the theater department has five professors, department head assistant professor David Goyette, assistant professor Ryan Combs, and four faculty members. This spring, assistant professor David Goyette’s contract is not being renewed for next year because the Truman theater department is experiencing cuts. Assistant professor David Goyette’s contract is not being renewed for next year because the Truman theater department is experiencing cuts.

The Office of Residence Life will implement the PAS in the beginning of January after new ID cards are made, and Residence Life will keep residence halls informed about the changes that will occur. Gardner, interim director of Residence Life, said. All doors in each residence hall have the capability to only certain shows have been locked and unlocked by software of new proximity cards. This may seem like an inconvenience, but Gardner said real concerns have not occurred. Some students have told Gardner that they understand or accept the new system, but they are also aware of the problems it can cause. Gardner said some students will have to make, and students recognize there will be some inconvenience, but that there is not the ability to open any door at any time. This is because any remaining at the end of the semester will be lost.
