Students at Truman State are no strangers to the effects of natural disasters. Missouri has been the site of many severe thunderstorms, devastating hail storms and even tornadoes. The severe storms that passed over the state last weekend left heavy damage in their wake, but none of the same magnitude as the storm that struck Nepal last week.

The Nepalese earthquake has been described as the worst earthquake in recorded history. The death toll from the magnitude 8.1 earthquake stands at more than 5,000 people and counting, the Nepal government reported on Sunday. The earthquake hit the epicenter in the city of Kathmandu, the capital of Nepal, which is the home of the nation’s largest university. The seismic event caused significant damage to buildings and infrastructure in the city, and reports indicate that many buildings, including hospitals and schools, have collapsed.

The earthquake has had a significant impact on the region, with infrastructure and buildings damaged or destroyed, and many people left without shelter. The immediate response has been a humanitarian crisis, with aid organizations rushing to provide assistance to those affected by the disaster.

The Index reserves the right to edit submitted material because it consists of the editor-in-chief, managing editor and opinions editor. The first copy is free, and additional copies cost 50 cents each. The Index is published Thursdays during the academic year and is distributed to all students at Truman State University. Letters to the editor are due by 4 p.m. on the Wednesday before publication.

To submit letters to the editor, email index.editor@gmail.com, call 660-785-4449 or submit a letter online at http://thetrumanindex.com. All letters to the editor must be typed and submitted by students at Truman State University, Kirksville, MO 63501.
