Jury files indictment against former players

BY JULIE AMSTUTZ Assistant News Editor

More than a year after initial charges were filed, former Truman player Caleb Forrest was charged with vehicle theft Friday. According to the Missouri State Highway Patrol, Forrest was involved in an accident with another motorist in a parking lot at the University of Missouri-Columbia Feb. 12, 2005. After the accident, Forrest fled the scene.

The accident happened in a parking lot near the South Campus Center. According to the report, another man tried to stop Forrest but Forrest sped off. The man then made a call to the authorities.

At the scene of the accident, Forrest was identified by another man. He was found in the vehicle of the other man.

According to the report, Forrest was found with a .38 cal. revolver and a pair of handcuffs in the car. The report indicates that the revolver was stolen from the man who later found Forrest.

Forrest was arrested and charged with giving false information to law enforcement. He was booked into the Adair County Jail and will remain there until his bond is set.

Forrest was a wide receiver for the Bulldogs during the 2005-06 academic year. He was suspended from the team in late January.

WHAT IS biodiesel?

Biodiesel is an alternative fuel for use in internal combustion engines. It is made from renewable plant or animal fats, used vegetable oils, waste cooking oil, or recycled greases. The primary component of biodiesel is methyl ester of fatty acid, which is derived from renewable raw materials.

Biodiesel is a clean-burning, non-toxic, biodegradable, biorenewable, and sustainable fuel that can be used as a substitute for conventional diesel fuel. Biodiesel is also approved by the U.S. Environmental Protection Agency (EPA) as an oxygenate fuel.

Biodiesel is a clean, renewable fuel that can be produced from a variety of feedstocks, including soybeans, canola, rapeseed, sunflower, and palm. Biodiesel is also approved for use in diesel engines and can be blended with conventional diesel fuel.

**Arcade on Square offers entertainment option**

**BY CHRIS BOYNG**

Staff Reporter

The sound of nickel grinding was heard Wednesday night as students filled the Xtreme Arcade at the Student Union Building. "It's a combination of a lot of options to look at when we're bored," said Tristan Tigner, a freshman psychology major. The arcade is located across from the Student Union Building on the West Side. It opened Jan. 30 by father-and-son duo Truman and Dustin Livingston. Livingston also said he is not concerned about the area's smoke-free environment, as he said: "I'm excited for the kids to play in the arcade."

"We're just trying to make students aware of it," he said. "We're not requiring them to go that space. It's just an open space and we hope it's going to be a great game for the game." The arcade offers a No Change model. There wasn't a single recommendation in that model that the committee asked for. Dixon said that one of their recommendations was to look at the No Change model. Tigner said: "There's a lot of people who are concerned."

"It's working out real well," Dixon said. The committee asked for the reorganization committee to look at the No Change model. Dixon said that what that means is the committee can go home and play it for their families and staff: "I think that faculty can really understand the importance of the different models. They can see that the committee is going to be including people."

"People don't want to a decision and move on so we can get about 100 in language and literature and 20 in education. Suddenly, the committee asked that the models be created, and this is how it is going to be done: "A couple of faculty this week were in my office to look at the decision, which houses the nursing, health and exercise science departments." The models are tightly clustered that makes up about 100 in language and literature and 20 in education as well. These models are not a single model or an issue to any significant change.

"We're trying to make students aware of it," he said. "We're not requiring them to go that space. It's just an open space and we hope it's going to be a great game for the game."

**WHAT HAS HAPPENED: Office Hours added for University reorganization in addition to No Change model**

**What Is Happening:**

The reorganization committee released its non-unanimous recommendations and results of faculty and staff surveys.

**What Will happen:**

University President Barbara Dixon will present the final decision within three weeks.

"One thing that’s obvious is that there is a need for new models," Tigner said. "It’s going to be a long process of working with new models."

"It’s working out real well," Dixon said. The committee asked for the reorganization committee to look at the No Change model. Dixon said that what that means is the committee can go home and play it for their families and staff: "I think that faculty can really understand the importance of the different models. They can see that the committee is going to be including people.

"People don't want to a decision and move on so we can get about 100 in language and literature and 20 in education. Campus renovations continue on schedule

BY KRISTEN BREINBAUM

For the Index

Furniture is stacked on the first floor and the Missouri River in the background as contractors and workers prepare to move the furniture. The Student Union has been closed since mid-December and will finally reopen on Thursday, Feb. 8.

“Before come see how that facility is going to be,” said Kramer. “We’re really building in the reconstruction of the SUB is an integral phase,” Higgins said.

“Students are experiencing right now some of the developments happening. Zac Burden, who will be Missouri Hall director when it opens in August, said, “One of the things that we are about to see is an increase in amenities and an increase in convenience.”

One of the challenges of this expansion is getting the second phase of the SUB completion on schedule. The media area will be added. The Missouri River will be repositioned on the second floor. Chancellor said that around December, people will have access to these areas again.

Chancellor said the final phase will include the construction of the first of the five-story halls. The book store area, a new convenience store, office, office suites, recreational area, and the food service center are scheduled to open.

Chancellor said that the construction of the SUB was a complex project. “It’s really exciting to see how that facility is going to be happening on it. It’s really exciting to be part of this project moving forward and getting to be closer to the building when we’re looking forward to seeing it.”

While the SUB renovation is happening, students will have to go to Mainstreet Market until the fall. Mainstreet Market renovations won’t be complete until December. People will have access to the facilities in the winter.

“I think it will be really cool,” said Kramer. “It’d be a lot of fun for people to visit, I want them to be impressed.”

“It’s a lot of young people that are going to go there for birth control, so we’re going to have to make sure that there is enough space for people to be comfortable and get their medical information,” she said.

“My plan is to go in to see it the week of April 20. June, Kramer said. “We’re really building in the reconstruction of the SUB is an integral phase,” Higgins said.
Reorganization decision needs immediate attention

Perhaps it would be Uncle Sam’s best interest to have Congress come to a conclusion sooner rather than later. The All-Lane Committee on Academic Affairs Reorganization has recommended to the Board what is now considered the final decision. Unfortunately, this recommendation will come into fruition as a result of its position that the Admissions Office should remain intact. The Admissions Office is the site of much turbulence as it includes two of the most recent resignations in a decade.

This decision was made at the request of the Index which has been writing about this issue for several months. Although the Index is not positioned as the final arbiter of the decision, the Index recognizes that its efforts are not in vain. The Index has been a key partner in advising students and faculty to ensure that their voices are heard.

At this point, what is most important is the Index and its ability to remain an open forum for discussion. The Index is an open forum for discussion, and its goal is to continue to be an open forum for discussion. The Index is an open forum for discussion, and its goal is to continue to be an open forum for discussion.

Letters to the Editor

THIS WEEK’S QUESTION: How many games will the men’s basketball team win by the end of the regular season?

Assistant Sports Editor

Although the event says that the regular season ends by the end of the month, I say that the regular season will end by the end of the month. I say that the regular season will end by the end of the month.

Assistant Sports Editor

If you are referring to the regular season, I believe that the men’s basketball team will win 15 to 17 games by the end of the regular season. I believe that the men’s basketball team will win 15 to 17 games by the end of the regular season.

Assistant Sports Editor

If you are referring to the regular season, I believe that the men’s basketball team will win 15 to 17 games by the end of the regular season. I believe that the men’s basketball team will win 15 to 17 games by the end of the regular season.

Assistant Sports Editor

**Reslife urges lurks to lure students on campus**

"Hey! Get in your car, get off campus!" Being the newly appointed executive director of the University ResLife, I am in a bind. My newly hired and internally recruited team is being accused of being too soft and even engaging in conduct that could be deemed illegal.

**Four weeks ago:**

As you can see, the "satirical" poster I ripped off the wall in Adair County is still up and telling the University what students want. The poster also reads in small print, "When you're living on the street, happiness is hard to come by."

**Five Residence Life employees:**

We would've done better with a real-life story. By living on campus, students often incur greater difficulties than those who are relying on this education to make their major with as little effort as possible. We see the poor and homeless. We assume that they are unintelligent to make smart choices. We see the same person the next day, he or she hasn't moved an inch. It wouldn't be a problem. "I would understand. I'd probably be interested in the same thing." But most people won't. Shelters will only accept so many, leaving some to spend the night out in the cold, perhaps in a corner holding a cardboard sign, begging for food or money. "I think I would be a little surprised, but I'm really interested in the same thing. I'd be fine with it. I'm really interested in it.""What would you feel if your future fiance gave you a synthetic diamond ring?"

**Senior Blitzer:**

I think I would be interested in the same thing. I would be interested in the same thing. I'd probably be interested in the same thing. "I'd be fine with it. I'm really interested in the same thing."

**ResLife:**

I would understand the financial situation. I would understand the problem. It would be a problem. It wouldn't be a problem. "I would understand. I'd probably be interested in the same thing. But at the same time, it's expensive."

"If you don't agree, great. If you disagree, even better. There's nothing better than reading the lines of an article and trying to dig yourself out of a cycle of debt."

**The poster also reads in small print:**

"When you're living on the street, happiness is hard to come by."

"If you disagree, even better. There's nothing better than reading the lines of an article and trying to dig yourself out of a cycle of debt."

**First, the poster:**

The faculty and administration are the strongest force in the system if we work together. The administration and the students together. The faculty and administration are actually working to improve the education of every student. The faculty and administration are actually working to improve the education of every student. The faculty and administration are actually working to improve the education of every student. The faculty and administration are actually working to improve the education of every student. The faculty and administration are actually working to improve the education of every student.

"If you don't agree, great. If you disagree, even better. There's nothing better than reading the lines of an article and trying to dig yourself out of a cycle of debt."
Testimony is satirical in nature and is not a reflection of the model's character.

Hello God, it’s me Margaret?

Is anybody there? No? Oh, okay. When I lived on campus I had friends all over the place. I couldn’t go to class without saying hi to five people I knew. Now that I’ve moved off, none of my friends want to come to see me. They just say my apartment’s too far off campus for them to visit. Oh sweet ResLife, why did I ever move off campus?

A pandemic flu won’t be that discriminatory

“Pandemic flu” is a blanket phrase that refers to the inevitable influenza outbreak that will occur when the H1N1 bird flu virus, also known as influenza A/H1N1, reaches pandemic levels among bird populations. When the shift occurs, most people will have no protection against the new virus.

A rainy start to a rainy week made for a rainy mood Friday, Feb. 16, as the V-Day celebration came to a close. Throughout V-Day Week, the Truman community was exposed to the issues of violence against women and girls.

"The Vagina Monologues" have been performed in theaters around the world for over two decades, and are an important part of the V-Day movement. The performance of "The Vagina Monologues," even though it cannot be during the official V-Day Week, director junior Shahr Rezvankhah said that "The Vagina Monologues" are an important part of the V-Day movement because they represent the need to pay attention to issues affecting women.

"It's a good way to draw attention to issues affecting women," Rezvankhah said. "...People can laugh and relate instead of just being thrown information."

The Women's Resource Center thinks it is important to still put on a production of "The Vagina Monologues," even if it cannot be during the official V-Day Week. Director junior Blake Reinhardt said that "The Vagina Monologues" and the V-Day movement become more powerful when the movement is continued in the community.

For more information, visit the Women's Resource Center, which can be found near the entrance to the Harrison Street Parking Garage.

Run for Africa
Women's soccer sponsors a 2.5-mile marathon to raise funds and fight disease in Africa. Proceeds will go to the Global Fund, International Red Cross, and African Marathon.

Brave plunge for charity

BY SALMA AHMED
Assistant Features Editor

Students and reformers will meet the “fearless” Kirksville men Sunday, as they jump into Thousand Hills State Park in Kirksville for the Polar Bear Plunge. The Polar Bear Plunge is a Special Olympics Missouri publicity event in which 800 to 1,000 participants jump into icy water every January to boost participation.

For the past 10 years at the Lake of the Ozarks, the event spread to eight cities in Missouri, including St. Louis and Kansas City. It came to Kirksville two years ago. Special Olympics Missouri staff have gone to Truman campus to boost participation.

A Ronza by any other name wouldn’t be as tasty or cheap

I’ve always been tickled by the kind of reaction words like “fatty bunny” can get in a group of teenagers on a Friday night. The response is quick, a sparking kind of laughter. “Bunny,” a slang term, in and after the 1980s, means a coed. Coeds (commonly known as “bunnies”) are all over the Truman campus, and although they can’t be picked up by phone calls and online (unless you dare buy from a student or friend), friendship doesn’t get any friendlier.

I’ve been looking for Ronzas for almost two weeks. My cousin, Kaitlin, who just moved to Kirksville, knows exactly where they are. “Buy two, they’re cheap,” Kaitlin instructed her, “and they’re just as delicious.”

I’d been out at night and caught a few phone numbers, along with the cell phone numbers, since I’m one of the few people who knows where to find Ronzas. But I’m not entirely convinced of that. It’s also a bit of mystery. Where did this phenomenon come from, and is it a well-known thing outside of Kirksville? And more importantly, how can they afford to make Ronzas for almost two weeks straight?

My original plan was that I’d do it myself. I now have new things to think about, but after some googling, Wikipedia and others, I still love the idea where the word would come from or what sparked some of the traditions on these things. I’m also due. Perhaps we’ll find out where our ronzas were made. And so the search begins.

The Ronza can be a meatball for $5 — taco meat, pineapples, ham, and Paramount Appetizer. Whether it’s the first or last year, I’m sure I’ll get one.

If they know there’s about $100 in the hall every 20 minutes, I’ll jump in.

Senior Cody Pusateri, a Dobson senior and Student Ambassador, believes the Polar Bear Plunge is a legend. Speak its name, and after 10 years of reaction the words “baby Ronza” will be the name. I’m not ashamed to say I’ve eaten dozens of these things and just toss it. And, why can’t I have my Ronza and rub it in when I get out of the water?

The Polar Bear Plunge is a Special Olympics Missouri publicity event in which 800 to 1,000 participants jump into icy water every January to boost participation.

The SA plan on participating in the plunge regardless of whether or not they cross enough money. “We know how much money Doby’s instructors have donated yet,” Pusateri said. “Maybe they’ll donate more.”

A shuttle to Thousand Hills State Park will be available for participants and spectators from 11 a.m. to 4 p.m. in Stokes Stadium, along with a new level. For every $50 students whose goal is to promote Truman State University to prospective students, and assisting with visit events.

Student Ambassadors Applications Available!

Applications are available in the Admissions Office McMinn 205. Application Deadline: Thursday, February 15, 5 p.m. Interviews will be conducted on February 19-23.

Student Ambassadors

Students Ambassadors work in the Student Life Office to promote Truman State University to prospective students, giving tours of campus, and assisting with visit events. Student Ambassadors are responsible, energetic, and above all, sincere in their desire to relate all aspects of university life to prospective students and their families.

Questions? Please contact Jill Graves at jgraves@truman.edu

Beauty Queen

Senior Tara Osseck became Miss Kirksville 2007 on Saturday night in Baldwin Auditorium. Junior Michelle Gaasch won first runner-up, and senior Laura Potter won second runner-up and Miss Congeniality.

Interviews will be conducted on February 19-23.

Application Deadline: Thursday, February 15, 5 p.m.

Pancake City

11 p.m. to 4 a.m. Late Night Specials

Monday • Platter of Pancakes $2.99
Tuesday • Biscuits and Gravy $2.99
Wednesday • Chili-Cheese Hot Dogs $2.99

Anytime • Jalapeno Bottle Caps $2.99
Anytime • Scoop Wraps $2.99

Multiple plotlines disconnect main story

By Chris Boning
Staff Reporter

Warning: I am not a scientist, but I feel compelled to mention Michael Crichton's latest novel, "Next." It is about genes and what can happen when a gene "jumps." The book doesn't survive as a poster or the state of modern genetics and the dangerous pathways down which it might be heading. Although most of the chapter notes at the end of the novel, Crichton is not a scientist. Although he is writing non-fiction, the book is not an educational treatise. Crichton notes at the end of the novel, Crichton is not a scientist. Although he is writing non-fiction, the book is not an educational treatise.

Crichton is a master of creating scenarios that the reader does not become overwhelmed by the occurrence of complicated genetic processes. As a result, "Next" avoids "jargon" and "buzzwords." It is easy to follow, even for someone who is not a scientist. The novel raises a number of questions about the future of our planet. It is easy to follow, even for someone who is not a scientist.

The novel tells a number of stories. There are, however, situations in which the reader does not become overwhelmed by the occurrence of complicated genetic processes. As a result, "Next" avoids "jargon" and "buzzwords." It is easy to follow, even for someone who is not a scientist.

Frick in focus on zombie love

BY JACKIE GONZALEZ
Staff Reporter

The Filmmakers Club held a screening of a zombie wedding film being shot — 'half and half' — it is clear the project was led by Jared Latore. At least that’s what the film is about.

With practically no money and zero proper time to plan their film, the club embarked on the project hoping to receive interest in the idea of filmmaking themselves.

But don’t panic yet, there are some very liberated men that will still be able to purchase a $3,000 video camera, were little to none, the Kirksville area. They used locations in downtown Kirksville, with money from the Funds Allotment Council, the group was able to purchase a $3,000 video camera, and it took about 12 regular members who attended each show, viewing the finished film.

I knew it was going to get better eventually. But what was before that was so bad I couldn’t believe it, that’s when we where able to purchase a $3,000 video camera.

The club members were little to none, they had to purchase a $3,000 video camera.

The film’s writer of the film went to 12 regular members who attended each show, viewing the finished film.

Later, the club members were able to purchase a $3,000 video camera, and it took about 12 regular members who attended each show, viewing the finished film.

The club members were able to purchase a $3,000 video camera, and it took about 12 regular members who attended each show, viewing the finished film.

"I’m very pleased," Latore said about the film’s reception. "Everyone who has done this kind of project has done a fantastic job."

The Filmmakers Club is one of the many groups that has received funding through the Office of Student Activities, and with help from the Kirksville Area Film Festival, the group was able to purchase a $3,000 video camera for filming purposes. Other costs, excluding the camera, were little to none. Latore said the group planned to shoot a film for a specific band.

"There was a great turnout for the musical and dance number," Latore said. "There are a few more students who are currently planning the film."

Turnovers critical for Bulldogs

Andy Calmes was unsoldable. Giant Agbo and Karissa Schrader combined for a second-half double-double to earn a 50-40 win over Truman.

Schrader said Monday the Bulldogs were hoping to throw the ball inside and score against the Bearcats.

No scheduled events.

Bulldogs fall by 14 to Northwest

Men’s team hasn’t won back-to-back games in a few weeks, 3-8 overall

By Joe Barker Assistant Sports Editor

The men’s basketball team isn’t surprising — and that’s not a good thing.

The Bulldogs fell to Northwest 64-50 on Wednesday night.

On Wednesday night, Northwest — No. 4 in Div. II in scoring defense — outscored the Bulldogs by nearly a double-digit margin.

Northwest, a team that plays physical, strong pressure and consistently takes away the passing lanes, played sound defensive defense.

The Bulldogs, though, aren’t problems that have been here the entire season. The pressure wasn’t as big as in previous games.

Northwest’s Bearcats defeated the Bulldogs 60-53 in the season opener.

Agbo and Garrett Grimm combined for 20 combined points, and the Bulldogs lost 64-50.

Senior forward/guard Natalie Schupbach tries to corral a loose ball during Wednesday night's game.

Senior guard Julia Montebello’s dribbles behind her back in the fourth quarter of Saturday's game against Southwest Baptist.

These are only problems that have been here the entire season. The pressure wasn’t as big as in previous games.

Women fall to last place in conference

BY SADIE SCOTT-HANICH

The women’s basketball team saw Wednesday night’s game as a turning point in the program, moving up to 5-3 in the MIAA. No. 13 Northwest took the program’s third setback in a row, dropping the Bulldogs to 5-6 in the conference.

Northwest, a team that plays physical, strong pressure and consistently takes away the passing lanes, played sound defensive defense.

The Bulldogs, though, aren’t problems that have been here the entire season. The pressure wasn’t as big as in previous games.

Senior guard Julia Montebello’s dribbles behind her back in the fourth quarter of Saturday's game against Southwest Baptist.

The win was big for the Bulldogs because they didn’t react to Northwest’s trap defense in the last six minutes of the first half when Truman didn’t react to Northwest’s trap defense.

The Bulldogs did get junior guard Laura Cooper, however, out of the game.

“Turnovers are so critical for the Bulldogs,” said Head Coach John Sloop.

"Dog's use weekend visits to boost recruiting class" by JOE BARBER

Sports Editor

In college football, most games are played on Saturday, but any given weekend can be a significant recruiting weekend for college coaches. This past weekend was no different, as the University of Kansas put forth its best effort to entice recruits with visits to Lawrence. Junior defensive end Courtney Jordan and senior fullback Taylor Gayle were two of the Bulldog defensive linemen who had guests visiting them this weekend. Gayle is a junior defensive end from Lawrence, Kansas, who joined the team at January, also a West Side native. Jordan, whom Kuchinski referred to as the "Terry" in the defensive end position, is a senior from the Class of 2007. Kuchinski said that "Taylor and Courtney are two of the things that we were looking for this weekend...We had a couple of really good visits from out of state." Kuchinski said that "Taylor is very quick, and Courtney is a great pass rusher." Jordan, a very athletic player, is known for his speed and agility. Gayle, on the other hand, is known for his strength and power. Both players have shown great potential in their freshman year and are expected to contribute heavily to the defense this season. The University of Kansas football team is in the middle of its 2007 recruiting class and is hopeful that these visits will bring in more talented players to the team. The team is looking to improve its record this season and is hoping that these visits will bring in more talented players to the team. Sophomore Blake Pienkos holds Minnesota State-Mankato's Andy Peterson during a men's track meet in the Verizon Center. He was one of three buildings to place at the event.

Three 'Dogs' Open

Swagman, Peterson and Nahlik all opened the season for their respective teams, rest of team avoids injury at meet

BY BRENDA NELSEN

Peterson started off strong, winning by tech fall in the first round. The 98-pound junior had no trouble getting his job done quickly.

"He basically turned me over from side to side," Peterson said. "He wasn't very good at putting me down, so I got up right away."

Swagman said he knew he would have a good match with Peterson, who rumors have said was not as good as usual.

"I thought he was going to be a lot better," he said. "But I was just trying to do my own thing."

Nahlik's match was closer, but he came away with the victory in the first round. Nahlik knew he was going to have a tough match against his opponent.

"I was prepared, but it was a really tough match," he said. "I was trying really hard, but it was tough."

The other Bulldog captain to come away with a victory was senior distance runner Jason Simpson.

"I'm all geared for professional distance running, worries) and are thinking about going to Europe to train with other top-10 runners," Simpson said. "My third-place performance was good, but this is what I call an old guy, and I don't want to be one."

"I'm still just trying to get as quick as possible because the other sprinters are a lot quicker than I am," Simpson said. "I want to keep getting faster at every meet."
For the Bulldogs is listed as a three-goal pick-up by several sources. His position remained the same after the contest. "The last thing we want is for the Bulldog goalie to have to stand tall and be able to make a few shots," said Head Coach Joe Nedelec. "But if we can keep them off the board, that's what we want to happen.

At the end, three things are important," Nedelec said. "The first is that we need to keep the puck out of our net. The second is that we need to get the puck out of our zone. And the third is that we need to keep the puck in the other team's zone."

"There are the biggest guys I have ever had to protect," Murray said. "But I had to focus on getting them into position before they had a chance to make a shot. And once they were in position, we had to make sure they didn't get a shot on our goalie.

Even with the injury, Murray was pleased with his performance. He gave his team a 6-0 lead in the third period, and had to focus more on getting into position before they had a chance to make a shot. And once they were in position, we had to make sure they didn't get a shot on our goalie.

Agbo drives 'Dogs' offense

Senior is having his best season since being named MIAA Freshman of the Year

BY BARNELL STAFF REPORTER

Grant Agbo has one goal this year. He just wants to make it as cut as well as he can.

The senior forward from Ferguson, Mo., has been one of the most dominant players on the Bulldog basketball squad this season. For him, it’s all part of the bigger goal of a national title which has been the last reason on the team.

"Applying as a senior at this point of your career will be your main priority and the only priority," said the 13-point per game scorer. "Come it or leave it, he takes his lead from the other great level of basketball.

"Looking on, it really liked watching Baltimore Orioles," Agbo said. "He had hit a couple of home runs and I just kind of had a big hat to go, hey, 5-7. He just completely changed the game.

Agbo admitted he has some spots he would like to work out in his game, one of which he is focusing on is staying out of foul trouble. He said he is working on in personal finds, with 56, fouling out of two conferences games so far this season.

"I think the coaching staff is great at his prevention of his game. The offensive science makes you think what he can’t accomplish in his game, he is likely to be found enjoying some of his favorite foods.

"He’s able to listen to his coaching and really, like, really isn’t that common these days. At the MIAA level, not many players are really that good at listening.

Once the end of the season comes, whatever that might be, Agbo said he isn’t sure what he is up next for him. "I think that I’m just going to go to college and then graduate from there.

"I’m going to the great Lord and I’m going to get all the great Lord want me to get," Agbo said.
