**The Exies make soft impact with album**

The Exies aren't the band to look for to reproduce one of the hot hits of the '90s. This might be the first time the band has made a record and not been able to followup. And if the album, "In the Remainder of Our Lives," is any example, it could be the band's final album. The Exies are a South Florida band, and they've been trying to record music for a while. The band has been trying to work on things alone. Stop and get feedback from other bands.

The band's in the studio just for the last time. The band is still young, and they've never been able to make a record. The band has never been able to sell out of anything. There have been great bands with the band, but why would anyone want to reproduce one of the hot hits of the '90s? This might be the first time the band has made a record and not been able to followup. And if the album, "In the Remainder of Our Lives," is any example, it could be the band's final album.
