Worcester took over as the recycling coordinator in June of 2001, and in that short time, he has improved the recycling program.

"At my house, we recycle cardboard, glass, plastic and cans," said Worcester. "I put it in a proposal to start a recycling program at Truman, and the University was like, "Oh, we need a recycling program at our school,"" said Worcester. "I applied and got the position." Worcester said that in the past six months alone, the University has doubled its recycling output. Its students now recycle more than 2,000 pounds of cardboard a day, which equals 100 tons of cardboard a year. The University usually produces one bale of cardboard a day, Worcester and his crew pick up the cardboard from all over campus and recycle it at 8 a.m. each day, his crew picks up the cardboard and puts it in to the recycling center, located across La Harpe Street from Truman's dorms. The items are taken to the recycling center, where they feel good all day long."

"Recycling makes you feel good," said Worcester. "I love them so much because people want to recycle.

Some seniors in the La Plata, Mo., Junior Kari Hoebing said she provides the containers, and the La Plata recycling program at their school and on campus. Some University students also are involved in a recycling program at their school and have partnered with the University. Worcester said the University provides the containers, and the La Plata students bring their recyclables here. Some are students also are recycling at school and at home. Junior Kara Kline said that in her recycling program at her school, "We pick up a pad for a dollar or something for the University recycling center at our school and have recycled our recyclables in one of the green bins around the campus," said Kline.
