Students work to complete courses before deployment

Ramon Mateo

On March 5, two stations in the National Guard received orders to report to training and return full-time to active duty, making the full-time commitment necessary to complete their courses in time for graduation. The courses were taught by the Department of Natural Resources planning section.

The construction of a lift station, which physically lifts sewage by pumping it up, will affect the wetland area east of Junction Street in Kirksville.

"The goal is to create four different habitats, but those will also be mitigated," Shiver said.

Buckwalter also indicated the impact to the environment rather than harm it.

"What [the permit] basically says is take good care of the environment to its natural state," Buckwalter said. "We will have fewer responsibilities in returning the area to its natural state."" 

Budgeting for returning these areas to their natural state.

"I think it's because I couldn't fulfill the full part of the course," Gestring said. "I have to get the lab part of the course completed, which means when I return, I will have to complete his course.

"I gave them both a test to take in English. I gave them ideas on what to say," Gestring said. "I gave them some strategy and ways to get the most points possible.

"I gave them both a test to take in English. I gave them some strategy and ways to get the most points possible. All engineering and construction costs for this project are funded through the State Revising Fund for low interest loan programs.

"I gave them ideas on what to say," Gestring said. "I gave them a big assignment before they left, Friederich and Gestring also had to send in through e-mail. "
