Noteworthy Niche

Daniels said he does not claim to have a studio that someone could find in a major metropolis like Nashville, but some bands on Truman’s campus say he has found similar little studios to be the perfect place to record. Sean Daniels, owner of Circle M Recording Studio, and his recording engineer, also called Sean Daniels, love the studio. They are a one-man operation built around a small, roomy studio in 1988, and it has grown by leaps and bounds ever since.

“They’re just something I always wanted to do, and I thought there might be a niche in this town for what I can do,” said Daniels. He said he built the Circle M studio in 1988, and it has grown by leaps and bounds ever since. The recording studio is tucked away in the back of Daniels’ store, which is located at 218 N. Franklin, just off the Square. The Circle M studio is equipped with a 32-track board, M Audio 2288 mixing console, 12-track A-DAT digital recorders, Alesis and Lexicon effects processor and a handful of other world recording tools. Daniels said all of these recording tools are walk out of the studio on a CD that he sends w/quality sound to a CD from Wal-Mart.

Daniels said the amount of people who take to record depends on how prepared they are when they come in. He said that if people come into the studio prepared, they will spend an average of one and a half hours recording and mixing.

Daniels said this means that if people are prepared and come in to record three songs, they could spend an average of three and a half hours recording and mixing. Daniels said it is important for musicians to prepare themselves before they go to the studio.

Daniels said he acts as the engineer. He said that if people come into the studio prepared, they will spend an average of one and a half hours recording and mixing.

Don’t rehearse on studio time,” Daniels said. “You don’t need to be there — that’s too expensive.”

The bands interviewed agreed that the more time they spent preparing, the better off they were when they got to the studio.

 “[Your] time is very precious,” said True Men member junior Chad Johnson, “but you don’t want to do that — that’s too expensive.”

Daniels said it is important for musicians to prepare themselves before they go to the studio.
