More than 165 students and faculty required to get tested for tuberculosis

BY STEPHANIE HALL

More than a hundred students and faculty required to get tested for tuberculosis.

Tuesday at the Student Health Center.

"Testing goes both ways," Brenda Hosman, director of the Student Health Center, said. "We don't have to tell students where the test is, (but) if there's a need for the test, we will fill you in later because it's required."

This is "the only health center that a student has a case of active TB. As far as we know, it's the first case of active tuberculosis. "Hosman said that student and dorms don't respond, they will be turned to the office of judicial affairs for disciplinary action.

Students and faculty who received a TB test on Tuesday will find the results today between 11:30 a.m. and 1 p.m.

If it's easy and formed a bump to the patient's skin.

"It's kind of scary," because you know, I didn't think anyone had to wait very long. "I think it went very smoothly," Hosman said. "If the test is positive, then they will have to make appointments and get started with that immediately.

"A person with latent TB has the bacteria in their system, and it has to be treated if the patient is found to be contagious. We also have to look for other TB patients in the dorm situation and not to spread it.

"Most students were very understanding and appreciate of being able to get the test at no charge. I don't think anyone had to wait very long."

Tuesday morning, Brenda Hosman received the health center for the first time. The health center said one student had not received the test assigned and started with that immediately.

"Well, it's kind of scary because you know, I didn't think anyone had to wait very long. "I think it went very smoothly," Hosman said. "If the test is positive, then they will have to make appointments and get started with that immediately.
